

Land Use Unit

Dr. Joseph P. Stoltman
Co-Coordinator
Michigan Geographic Alliance
Professor of Geography
Western Michigan University

Ecosystems & Biodiversity Unit

Pam Schmidt
Science Education Consultant
Western Upper Peninsula Center
for Science, Mathematics and
Environmental Education
Michigan Technological University

Water Quality Unit

Joan Chadde
Education Program Coordinator
Western Upper Peninsula Center
for Science, Mathematics and
Environmental Education
Michigan Technological University

Air Quality Unit

Dr. Janet Vail
Associate Professor
Annis Water Resources Institute
Grand Valley State University

Energy Resources Unit

Heather Luoto
Science Education Consultant
Western Upper Peninsula Center
for Science, Mathematics and
Environmental Education
Michigan Technological University

Nicole Olszowy, DEQ Editor

*Thank you to Michigan Alliance for
Environmental and Outdoor Education
(MAEOE) for their contribution.*

X = Addresses/Supports		JULY 2008
Life Science - Ecosystems		
L.EC.E.1 Interactions		
L.EC.04.11 Identify organisms as part of a food chain or food web.	X	
L.EC.E.2 Changed Environmental Effects		
L.EC.04.21 Explain how environmental changes can produce a change in a food web.	X	
GRADE 5		
S.IP.M.1 Inquiry involves generating questions, conducting investigations, and developing solutions to problems based on reasoning and observation.		
S.IP.05.11 Generate scientific questions based on observations, investigations, and research.	X	
S.IP.05.12 Design and conduct scientific investigations.	X	
S.IP.05.13 Use tools and equipment appropriate to scientific investigations.	X	
S.IP.05.14 Use metric measurement devices in an investigation.	X	
S.IP.05.15 Construct charts and graphs from data and observations.	X	
S.IP.05.16 Identify patterns in data.	X	
S.IA.M.1 Inquiry includes an analysis and presentation of findings that lead to future questions, research, and investigations.		
S.IA.05.11 Analyze information from data table and graphs to answer scientific questions.	X	
S.IA.05.12 Evaluate data, claims, and personal knowledge through collaborative science discourse.	X	
S.IA.05.13 Communicate and defend findings of observations and investigations.	X	
S.IA.05.14 Draw conclusions from sets of data from multiple trials of a scientific investigation.	X	
S.RS.M1 Reflecting on knowledge is the application of scientific knowledge to new and different situations. Reflecting on knowledge requires careful analysis of evidence that guides decision-making and the application of science throughout history and within society.		
S.RS.05.11 Evaluate the strengths and weaknesses of claims, arguments, and data.	X	
S.RS.05.12 Describe limitations in personal and scientific knowledge.	X	
S.RS.05.13 Identify the need for evidence in making scientific decisions.	X	
S.RS.05.15 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.	X	
S.RS.05.17 Describe the effect humans and other organisms have on the balance of the natural world.	X

GRADE 4		
H3 History of Michigan (Beyond Statehood)		
4 - H3.0.3 Describe how the relationship between the location of natural resources and the location of industries (after 1837) affected and continues to affect the location and growth of Michigan cities.		
4 - H3.0.4 Draw upon stories, photos, artifacts, and other primary sources to compare the life of people in towns and cities in Michigan and in the Great Lakes region during a variety of time periods from 1837 to the present.		
4 - H3.0.8 Describe past and current threats to Michigan's natural resources; describe how Michigan worked in the past and continues to work today to protect its natural resources.		
4 - H3.0.9 Create timelines (using decades after 1930) to sequence and describe important events in Michigan history; annotate with connections to the past and impact on the future.		
G5 Environment and Society		
4 - G5.0.1 Assess the positive and negative effects of human activities on the physical environment of the United States.		
C5 Roles of the Citizen in American Democracy		
4 - C5.0.1 Explain the responsibilities of citizenship (e.g. initiating changes in law or policy, holding public office, respecting the law, being informed and attentive to public issues, paying taxes, registering to vote and voting knowledgeable, serving as a juror).		
4 - C5.0.4 Describe ways citizens can work together to promote the values and principles of American democracy.		
GRADE 5		
UI.1 American Indian Life in the Americas		
5 - UI.1.3 Describe Eastern Woodland American Indian life with respect to government and family structures, trade, and views on property ownership and land use.		
UI.4 Three World Interactions		
5 - UI.4.1 Describe the convergence of Europeans, American Indians and Africans in North America after 1492 from the perspective of these three groups.		
5 - UI.4.2 Use primary and secondary sources to compare Europeans and American Indians who converged in the western hemisphere after 1492 with respect to governmental structure, and views on property ownership and land use.		
P3.3 Persuasive Communication about a Public Issue		
5 - P3.3.1 Compose a brief essay expressing a position on a public policy issue in the United States and justify the position with a reasoned argument.

for MEECS Ecosystems & Biodiversity Unit

Page 2 of 3

X = Addresses/Supports

JULY 2008

P.4.2 Citizen Involvement

- 4.4.2.1 Develop and implement an action plan and know how, when, and where to assess or inform others about a public issue.
 - 4.4.2.2 Participate in projects to help or inform others.

GRADE 6

H3 Historical Inquiry and Analysis

- 1.1.2.3** Identify the point of view (perspective of the author) and context when reading and discussing primary and secondary sources.
 - 1.1.2.5** Identify the role of the individual in history and the significance of one

person's ideas.

- ! **Ecosystems**
 - 3.2.1 Explain how and why ecosystems differ as a consequence of differences in latitude, elevation, and human activities.
 - 3.2.2 Identify ecosystems and explain why some are more attractive for humans to live in.

Use than others.

- Humans and the Environment**

5.5.1.1 Describe the environmental effects of human action on the atmosphere, lithosphere, and hydrosphere.

5.5.1.2 Describe how variations in technology affect human modifications of the

landscape.

- 3.1.3 Identify ways in which human-induced changes in the physical environment in one place can cause changes in other places.

P3.1 Identifying and Analyzing Issues, Decision Making, Persuasion

- Communication About a Public Issue, and Citizen Involvement**

6 - P3.1.1 Clearly state an issue as a question of public policy, trace the origins of the issue, analyze various perspectives, and generate and evaluate alternate resolutions. Deeply examine policy issues in group discussions and debates to make reasoned and informed decisions. Write persuasive/argumentative essays expressing and justifying decisions on public policy issues. Plan and conduct activities intended to advance views on matters of public policy, report the results, and evaluate effectiveness.

**Michigan Content Expectations – Grade 4-6 Social Studies
for MEECS Ecosystems & Biodiversity Unit**

Page 3 of 3

X = Addresses/Supports

P-4-2 Citizen Involvement

- P4.2.1 Demonstrate knowledge of how, when, and where individuals would plan and conduct activities intended to advance views in matters of public policy, report the results, and evaluate effectiveness.

- 6 - P4.2.2** Engage in activities intended to contribute to solving a national or international problem studied

G 6.1 Global Topic Investigation and Issue Analysis

- G6 - G6.1 Contemporary Investigations** – Conduct research on contemporary global topics and issues, compose persuasive essays, and develop a plan for action.
(Contemporary Investigation Topics: Global Climate Change, Globalization, Migration, Human-Environmental Interactions, and Natural Disasters)
